

ETN training webinar on

Management, visualisation and spatial analyses of data in aquatic telemetry

Damiano Oldoni, Jan Reubens, Peter Desmet,
Lennert Schepers, and Bart Vanhoorne

October 13th, 1:00 PM CET, Zoom

The webinar will be broadcasted via ZOOM. Please, **register** for the webinar [here](#), by October 5th:

https://us06web.zoom.us/meeting/register/tZArceupqDgsHNW3DYsxQU_98_vuU6kLe7u8

During this webinar, attendees will have the opportunity to work within ETN RStudio. For this you are asked to also **register** [here](#)

<https://rshiny.lifewatch.be/account?p=register>

On the registration page, please choose access to “ETN_data” + “RStudio”, and add a clear purpose “ETN webinar”

The webinar has the following agenda:

1. Introduction to ETN package (data model, scopes, functions)
2. Setup and installation
3. Hands-on session where we will guide participants through a user case
4. Data publication – download_dataset function, submission to MDA

Everyone interested is welcome!
